This document is intended only to be presented to, and used by, FCA authorised persons, including financial advisory firms and wealth managers ('Professional Advisers'). It is not suitable for, and must not be distributed to, clients or potential clients of any recipient. No investment, legal, tax recommendation or advice of any type and no suggestion of suitability of any investment for any prospective investor is given or implied in this document. The information in this document does not take account of the investment objectives, particular needs or financial situation of any client or potential client. It is important that Professional Advisers understand that the Issuer and Counterparty Dataset ('The Dataset') is not independent research. We do not provide any warranty regarding the data, methodology, scores or rankings; and we expressly exclude any liability for any judgement or interpretation based upon or influenced by The Dataset. Professional Advisers should reach their own judgement of issuer / counterparty financial strength / credit risk. Please see our presentations which provide the full introduction, overview and methodology details of The Dataset, including the purpose and what it is - and what it is not.

This document is for information only and is not intended as an offer, or recommendation or solicitation of an offer to buy or sell any investment, security, financial instrument or other specific product, to conclude a transaction, or to provide any investment service or investment advice, or to provide any research, investment research or investment recommendation, in any jurisdiction. By accepting this document you will be taken to have represented, warranted and undertaken that: i) you are a Professional Adviser (as referred to above); ii) you have read, agree to and will comply with the contents of this notice; iii) you will conduct your own analysis or other verification of the data set out in this document and will bear the responsibility for all or any costs incurred in doing so; and iv) you are not accessing and accepting this document from any jurisdiction other than the United Kingdom, in compliance with all laws and regulations applicable to such access and acceptance. This document and all information herein are provided 'as is', 'as available' and no representation or warranty of any kind, express, implied or statutory, is made by regarding any statement or information herein or in conjunction with this document. Any opinions, market prices, estimates, forward looking statements, hypothetical statements, forecast returns or other opinions leading to financial conclusions herein reflect our subjective judgment as of the date of this document. Any forward looking information has been prepared on a number of assumptions which may prove to be incorrect and, accordingly, actual results may vary. Past performance is no guarantee of future results; nothing herein shall constitute any representation, warranty or prediction as to future performance of any issuer / counterparty. Considerable care has been taken to ensure the information in this document is accurate, however no representation or warranty is given as to the accuracy or completeness of any information and no reliance may be placed for any purpose whatsoever on the information or opinions contained in this document or on its completeness and no liability whatsoever is accepted for any loss howsoever arising from any use of this document or its contents otherwise in connection therewith.

In addition to understanding the featured and benefits of structured products, Professional Advisers and investors also need to understand their risks and limitations: structured products present counterparty risk - the potential returns of a structured product and the repayment of money invested in a structured product usually depend on the financial stability of the issuer and counterparty; the level of return a structured product generates may be capped and / or less than the level of return generated by direct investment in the stock market or via active or passive funds; the terms of structured products can predefine what can be expected at maturity and at certain other dates, such as potential 'kick-out' and early maturity dates - but these terms do not apply during the investment term; the value of structured products during the investment term may be affected by various factors - while accessing an investment is usually possible, during normal market conditions, this is not guaranteed; past performance is not a reliable indicator of or guide to future performance and should not be relied upon, particularly in isolation; the value of investments and the income from them can go down as well as up; capital is at risk and investors could lose some or all of their capital. Professional Advisers and investors read the plan documents for any structured product plan of interest, in particular: the plan brochure and plan application pack, including the features and benefits, risks and limitations, and terms and conditions of the plan; and the issuer's key information document (KID').
